

Offline Content Engines

Air-gapped deployments keep every model and every byte of source material on the local machine. No request ever leaves the host. This first page establishes the operating context for the rest of the document and explains why network isolation is treated as a hard invariant rather than a configuration option.

Evidence And Provenance

Every extracted block carries a stable evidence identifier so that downstream artefacts can cite the exact page they drew a claim from. This second page exists to give the extractor a distinct heading and a distinct page number to recover.
